Headspace Board of Directors Meeting

Feb 10, 2026

Proprietary, Confidential, & Thoughtful

Agenda

Time (PST)	Session	Attendees
8:30 - 9:00 AM	*Optional Breakfast*	
9:00 - 9:40 AM	Opening Session	Tom
9:40 - 10:00 AM	Board Approvals & Committee Readouts	Tom
10:00 - 10:30 AM	FY25 Financials / FY26 Budget	Tom + Nihal
10:30 - 11:45 AM	FY26 Operating Plan	Eteam
11:45- 12:00 PM	*Grab Lunch / Break*	
12:00 - 12:30 PM	Closed Strategy Discussion	Tom, Nihal
12:30 - 1:00 PM	Closed Board Feedback Session	Board minus Tom

Board Approvals & Committee Readouts

Approvals / Readouts

Board Approvals

- Q4 Meeting Minutes

Compensation Committee (Ben)

- Bonus (2025 payout, 2026 structure)
- Employee Equity Pool, 2025 Dilution
- Market Gaps

Audit Committee (Julia)

- Audit Update
- Member Quality
- Cybersecurity
- Legal/Compliance

FY25/26 Financials

Exec Summary

For the First Time in its History, Company Achieved Positive Adj. EBITDA and Unlevered Free Cash Flow in 2025

Full Year 2025 Results

- Adj. EBITDA $10.8M, up $3.6M vs 12.19.25 Forecast of $7.2M (50% beat) driven by slightly higher revenue attainment and strong expense control
  - YoY Company improved Adj. EBITDA $25M and Unlevered FCF improved $13M over 2024
- Company reached positive Adj. EBITDA and Unlevered Free Cash in 2025

2026 Floor Plan

- Projecting: Rev: $199M (-8% YoY) | 71% Gross Margin (-2.7% YoY) | $10M Adj. EBITDA (-6% YoY)
- Projecting Adj. EBITDA slightly down YoY due to declining revenue offset by expense control

Cash + Oxford Covenants

- Cash
  - $10M additional Oxford line drawn on 12/8/25
  - Cash $1.4M higher than forecast due to Adj. EBITDA beat
- Oxford Covenants
  - Stronger liquidity covenant protection vs last update due to higher cash balance via 2025 EBITDA beat

Proprietary, Confidential, & Thoughtful

Full Year 2025 Financials

Beat 12.19 Forecast EBITDA by $3.6M due to higher revenue and continued tight expense control.

Versus 12.19 Forecast

Bookings (-$1.5M):
Unfavorability primarily due to B2B Employer, Baker Tilly and Veolia expansion push to Q1 26 (-$0.9M) and Betterfly partnership churn (-$0.2M). B2B Health Plans decrease due to Virgin Pulse renewal timing push to Q1 26 and lower clinical sessions ($0.5M).

Revenue (+$1.1M):
Favorability primarily due to B2B Employer one-time revenue from Betterfly and Adobe partnerships, US Navy expansion, and higher lives in some employee populations.

Gross Margin (+$2.3M):
Favorability primarily due to higher revenue and lower clinical demand resulting in lower Care Provider expense.

Operational Expense (+$1.4M):
Favorability primarily due to lower professional fees, lower headcount, lower healthcare expense, lower severance costs, and lower bonus (95% attainment), partially offset by lower capitalized R&D.

EBITDA (+$3.6M):
Favorability due to higher revenue and lower expenses.

Cash (+$1.4M):
EBITDA favorability of $3.6M offset by lower net working capital due to earlier AP payments.

ENDING CASH BALANCE	**$34.0M**	**$22.9M**	**($11.0M)**	**-32.5%**

2026 vs. 2025

Bookings (-$25.0M):
D2C decrease primarily due to market conditions and 50% reduction in performance marketing spend (-$18.5M). B2B Employer decrease due to potential higher churn (-$4.9M). B2B Health Plans decline primarily due to recognition of Cigna implementation bookings in 2025 (-$1.6M).

Revenue (-$17.2M):
Decline in D2C due to reasons mentioned above for bookings (-$14.5M). B2B Employer decline due to increased churn noted above (-$3.9M). Higher B2B Health Plans due to new Cigna sub-clinical (+$1.1M).

Gross Margin (-270bps):
Change in revenue mix. Less high margin D2C and B2B content revenue, increased lower-margin EAP and D2C therapy revenue.

Operational Expense (+$17.3M):
Primary drivers of YoY expense reductions are ($10.8M) lower Performance Marketing and ($4.6M) lower salary & related due to the recent reorganization, and reduced professional fees ($2.1M).

EBITDA (-$0.6M):
Primarily due to lower revenue and lower gross margin, mostly offset by lower operating expenses.

Cash (-$11.0M):
Declines primarily due to net interest expense ($9.2M) - see cash bridge slide for further detail

C2026 Target vs Floor

Adjusted EBITDA (+$6.6M)

- See slide 5 for detail

Net Working Capital (+$3.3M)

- Incremental cash collections due to B2B Collections timing vs Revenue

Cash Flow Drivers Commentary

Adjusted EBITDA (+$10.2M)

- See slide 5 for detail

Interest Expense (Net) (-$9.2M)

- Primarily reflects debt service on Oxford facility

Net Working Capital (-$4.6M)

- Primarily year-over-year revenue decline, as most customers pay in advance and lower sales reduce deferred revenue and cash

Taxes & Other Adjustments (-$1.2M)

- Primarily sales, VAT, and corporate tax payments

Cash Flow from Investing (-$5.5M)

- Capitalized R&D spend. Higher in 2026 reflects more investment.

Cash Flow from Financing (-$0.7M)

- Minimum required Oxford debt paydowns in 2026
- 2025 included $14.8M of net borrowings vs $0.7M net paydown in 2026

Proprietary, Confidential, & Thoughtful

2026 Oxford Covenant Summary

$10M DDTL Draw in Dec 2025. No debt borrowings in 2026 Plan. Lose DDTL 2 Access on 2/14/26

Commentary

Borrowings / Paydown
$10M draw in Dec 2025, no borrowings forecasted for 2026.
$0.7M in required paydowns in 2026

Debt Access
Through 2/13/26 ~ $11M via DDTL2 and RLOC
After 2/13/26 ~ $4M to ~$5M via RLOC

Liquidity Covenant
2025 EOY Cushion = ~$22M
2026 Cushion = Declines from ~$18M in Q1 to ~$9M in Q4

Recurring Revenue Covenant
>$30M+ cushion projected through 2026 EOY

Leverage Ratio Covenant
>$14M+ cushion projected through 2026 EOY

Other Considerations
B2B recurring revenue decreasing due to lower overall B2B revenue
Assumes Amazon is not recurring revenue due to utilization pricing

[1] Represents cash in non-qualified bank accounts as defined under debt agreement.
[2] Undrawn revolver availability is the lower of $5M or the total accessible capital.
[3] No longer available as of 2/14/25
[4] Availability based on prior quarter ending numbers. No longer available on 2/14/26
[5] Borrowing capacity is limited such that the post-draw leverage ratio must remain at or below 0.8x recurring revenue from the final month of the prior quarter

Proprietary, Confidential, & Thoughtful

FY26 Operating Plan

Proprietary, Confidential, & Thoughtful

Mental Health Market continues to evolve

1. Behavioral Health **Costs Continue to Rise**

- Costs are climbing, driven by over-reliance on 1:1 therapy
- Therapy is often used as a first-line intervention, even for lower-acuity needs
- Employers are seeking more scalable, cost-effective entry points into care

2. **Subclinical** Mental Health Is the Largest **Unmet Need**

- Burnout, stress, loneliness, and sleep issues are widespread
- These challenges drive productivity loss and downstream clinical cost
- Benefits leaders are prioritizing upstream prevention over reactive care

3. Buyers Want **Orchestration**, **not Just Access**

- Shift from “more sessions” to “right care, right time”
- Growing demand for stratified care and intelligent navigation
- Fewer vendors, better coordination across levels of support

4. **Outcomes** and **Speed** of Improvement **Matter More**

- Engagement alone is no longer sufficient
- Employers increasingly focus on measurable improvement
- Faster recovery translates into lower cost and higher ROI

5. **AI Interest** Is High, but **Trust Is the Gate**

- Strong curiosity about AI-enabled care models
- Heightened concern around safety, privacy, and efficacy
- Preference for clinically credible, responsible AI leadership

Mental Health Market continues to evolve

*Taken together, these shifts favor **integrated**, **stratified**, **outcomes-driven platforms** that **intervene earlier, guide** members **intelligently**, and **responsibly use AI** to improve recovery **speed** and cost **efficiency**.*

Cigna Launch Update

Placeholder. Will present latest stats live in Board Meeting.

GTM Q4 2025 and YTD 2026 Highlights / Lowlights

Highlights

1. Q4 2025 Renewals closed at nearly 100% of July Forecast ($90.4m achieved versus $90.5m)
2. Amazon subclinical deal won, with May 1, 2026 launch
   - Covers 1.9 million lives with Core & Ebb (global) and Coaching, Assessments, Triage (US only)
   - Utilization-based deal, projected to yield $6-9m year 1
   - Validates commercial viability of subclinical product
3. Cigna Evernorth expansion won, for 2026 in-year launch
   - 1.6m additional lives above original 7.5m Q4 deal
4. Renpho brand & content licensing deal closed
   - Embeds Headspace into eye massager physical device
   - Projected to yield $1m per year from 3 components:
     - $100K upfront licensing revenue
     - Per unit sales royalty
     - Revenue share for Headspace app upsells

Lowlights

1. Existing deal economics
2. New deal launch challenges
3. Sales team attrition

Health Plan 2026 YTD Summary

Initiative	Key Updates	Lessons Learned
Payer Pipeline Build	Initiated discussions with BH leaders at 10 health plans, including 4 national/ multi-state payers, 3 Blues plans, and 3 regional plans. Nearly all payers wanted follow-up meetings.	• Benefit expense problem statement is resonating; outpatient therapy spend is major concern, plans looking for help • Other BH vendors address this issue, with less comprehensive of a solution
Kaiser Expansion	Talking with national behavioral health leadership team on three initiatives: • Direct member steerage to coaching • Website redesign • Single-session coaching	• Steerage can drive meaningful in-year coaching utilization (+10-20%) • Kaiser website redesign can increase content app utilization (effect TBD)
Cigna Evernorth Behavioral Care (EBCG)	Engagement with Cigna captive provider group: • Headspace referrals to EBCG • EBCG clinicians prescribing our content • Assessments facilitation • Referrals from EBCG to Headspace	• Our content, navigation, and coaching complement clinical therapy, driving differentiation for therapists • Multiple therapist networks have made inbound inquiries on Headspace as an adjunct to their care • Partnering with EBCG is especially attractive, as our Cigna contract has built-in monetization (~90% of EBCG patients are covered by Cigna insurance)

Payer Target Account List - Introductions Requested

We are seeking warm introductions to key BH leaders within P&L leadership, Product, Clinical. We have created a list of target leaders at the following organizations, and would welcome introductions from board members.

Target Accounts	TCL	Target Accounts (cont'd)	TCL
Aetna/CVS (Nat'l)	23.6M	HCSC (BCBS IL, MT, NM, OK, TX)	16.0M
CareFirst BCBS (Maryland)	2.2M	Blue Cross Blue Shield of Massachusetts	2.3M
Highmark Health (Pennsylvania)	4.5M	Blue Cross and Blue Shield of Minnesota	2.0M
Blue Cross Blue Shield of Michigan	3.9M	Blue Cross and Blue Shield of Louisiana	990k
Florida Blue (BCBS FL)	3.4M	Point32Health (Massachusetts)	1.6M
Horizon BCBS of New Jersey	3.1M	Medical Mutual of Ohio	1.0M
Premera Blue Cross (Washington)	1.8M	Medica (MN)	1.2M

Wellmark (BCBS of Iowa)	1.3M	UPMC Health Plan (Pennsylvania)	1.2M
Providence Health Plan (OR)	500k	EmblemHealth (New York)	1.0M

Employer 2026 YTD Summary

Initiative	Key Updates	Lessons Learned
Employer Consultant Relations	Pipeline building activities in 2026 revolve around a Consultant Relationship Management function three times the size of the 2025 team. This enables significantly greater education and coverage of consultant relationships.	• Employer EAP pipeline opportunities are largely driven by broker relationships • Broker activity is driven regionally with key relationships that require cultivation • We will have greater presence at regional broker events & office locations
EAP Strategy Redefinition	Pivoted former Mercer partner, Sandra Kuhn, to drive EAP growth strategy, including: • Value proposition definition • Headspace positioning versus competitors • Operational integration with CCA	• Market signals indicate EAP market is moving towards mid-priced EAP solutions • Middle market lacks definition of trade-offs and expectations for reduced price points • Opportunities exist in industry verticals to develop special programs and moats
CCA Renegotiation	We are negotiating a potential contract extension with our EAP partner CCA, including: • Stronger operational integration • Improved margin-enhancing economics	• CCA is seeking a 3-4 year extension (current contract expires in April, 2027 • Price reductions will enable Headspace to participate in scale economies from dramatic growth in our EAP business

Early EAP Strategic Principles

Current State	Near-Term Future State
Feature-rich EAP model with capabilities and experiences siloed between Headspace & subcontractor	EAP as **orchestrated front door** for workforce mental health and employee support
Integration gaps with work-life, crisis management, and in-person care subcontractor create experience gaps and diminished member value	**Seamless navigation** across content, coaching, clinical care, and EAP services
Generic self-guided content and early engagement campaigns	Industry-specific programs built to maximize **population engagement**
Utilization-based metrics between discrete Headspace and CCA services	**Outcomes-based value** measured across the full combined spectrum of services
Unclear differentiation among employers and consultants on capabilities / features between EAP vendors	Clear positioning in market on Headspace services and **differentiated value proposition**

Deep Dive: Product

Agenda

1. Product Momentum
2. 2026 Roadmap
3. Talent & Org design

Product Momentum

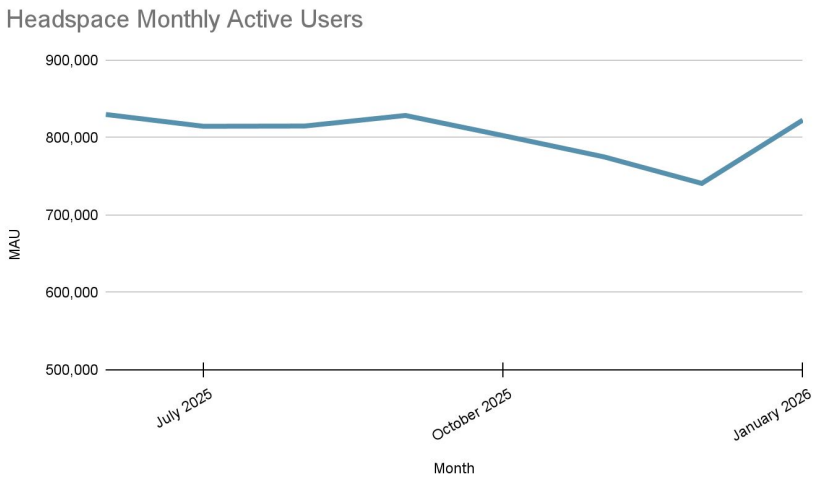
Innovation

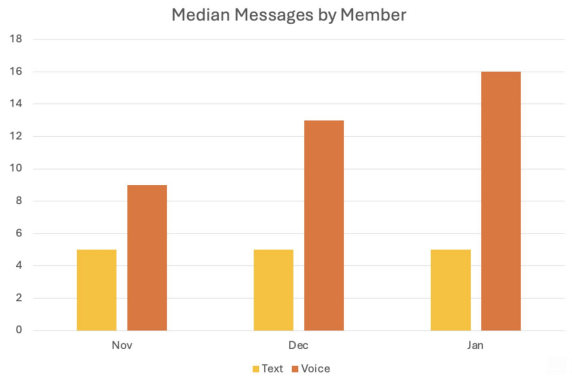
- **Consumer**
  - Timely topics, launched daily in Jan, with Pomodoro focus and motivation content series
- **B2B**
  - Cigna (7MM covered lives),
  - BSC Health,
  - US Navy
  - Amazon launch readiness with 11 languages supported, & journeys reviewed
- **Content**
  - Neurodiverse Minds (Cigna exclusive in 2026: 12 meditations)
  - Cocomelon *Wiggle to Wind Down*
  - Hyatt 5 sleep casts, new sound bath series

Foundation

- **Flutter rewrite** (2yrs project)
  - components reuse unlocked (critical for P13N);
  - rollout Feb 2 to Mar 16
  - monitoring eng velocity lift
- **Ebb Platform**
  - launched new multi-agent GenAI architecture
  - implemented multi-layered safeguards & age gating.
  - expanded risk monitoring, governance,
- **Craft Excellence tracks**
  - trained all design team on Cursor,
  - delivered product craft excellence playbook,
  - Adopted AI Audio and AI language translation tools within content Studio

Engagement Trends





- January MAU reflects an increase in member count (Members +2% MoM) but even larger gains in engagement rates (MAU +12%).
- This increase includes growing engagement with Ebb (+37% MAU since June). Launch of daily fresh experience on HS, with Timely Topics in Jan.
- January is typically a highly engaged month. However, Jan ‘26 MAU is -13% YoY, suggesting a greater need for new product innovations.

- Strong pattern of deeper interaction using Voice, both in total duration and the number of member messages sent.
- There is a long tail of very long interactions with the 95th percentile around 30 mins for both voice and text.
- Release on Feb 9 will let members set Voice as default. The speech to text system can sometimes break up input into chunks inflating messages, we will investigate events to make sure they are instrumented properly.

Notes: (1) MAU includes all users in a free or paid state who have had content, coaching, clinical, psychiatry, therapy, and/or Ebb engagement during the reported month. (2) MAU does not include up to ~7500 Sondermind and CCA members pending new data ingestion, Includes members mapped to B2B or DTC relationships. (3) Ebb: Default is text so that category includes “abandoners” (anyone exploring, opening Ebb and closing it immediately or after 1 message)

Headspace Innovation Roadmap 2026

Product

1 Trust as The Defining Currency

Innovation must *increase trust*, not just capability

Deliver Personalized care Experiences
Develop personalized care journeys across wellness, coaching, therapy, and psychiatry. Introduce journeys tailored to wellness tracking, and Tiered offering.

Expand Wellness Partnership Deliver the right care in time with deeper health partnership, and wearables integrations.

2 AI as a Care Multiplier

AI scales empathy, access, and quality without replacing human-care.

Design Ethical Intelligence
Expand conversational AI beyond Ebb conversations into care navigation and routing. Deliver Zero-incident safety guardrails

Lead AI thought leadership
Deliver AI guardrails for mental health, research science studies on impact of AI, and how Agentic innovation powers human care.

3 Outcome-based care at Every Step

What isn't measurable doesn't count

Deliver Measurable Outcomes
Enable measurement-based care across subclinical wellness, coaching, and clinical offerings. Deliver standardized outcomes tracking, and Evidence-based care models.

Scale B2B Benefit Management
Drive activation and engagement for employer and health plans. Deliver ROI and impact dashboards.

Product

Trust in Care as the Defining Currency

Mental Wellness as a daily habit

Q1 / Q2

- Passwordless login / SSO
- Habit loops with timely topics (New year new you, Love & Compassion, Sleep month, etc.)
- Support 20 languages (like EN, ES (LatAM & EU), FR, DE, JP, KR, IT, etc.)

Integrated Mental Health

Q2 / Q3

- Wearables integration (Oura / Apple Watch) and Ambient devices integration (Alexa+, Google Home)
- Dynamic landing care pathways
- Partnerships and Content activations (Neurodiversity, Sleep cast, SOS singles, Trauma tools, productivity series, micro-coaching, Nutrafol partnership)

Personalized Care Journeys

Q2 / Q4

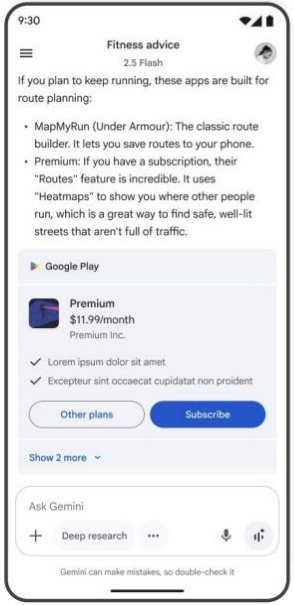
- Personalized experiences based on wellness tracking (Sleep, Anxiety, Stress) with relevant in-the moment content
- Integrated care journeys (from contemplation, to action, to maintenance)
- Pervasive “I need care now” experience from access to coaching to Ebb to crisis routing)

Example of how we can integrate with Gemini

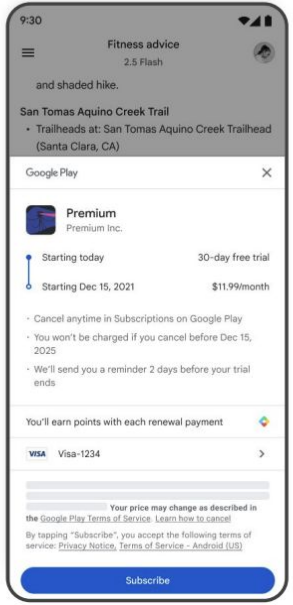
"Hey Gemini, I am considering getting really fit, recommend the best premium fitness classes I can buy"

Note: Mocks may not represent final products.

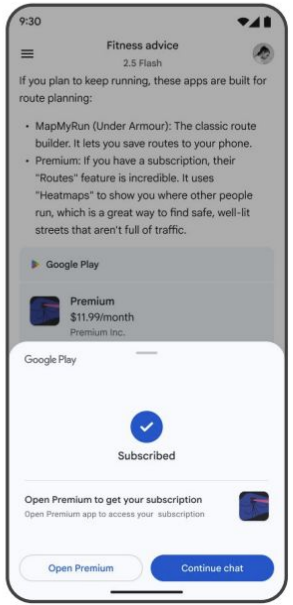
User query/conversation



Gemini response



User selects item and purchases



User opens subs to get fitter

Product

AI as a Care Multiplier

Conversational AI experience

Q1 / Q2

- Advanced prompting intelligence leveraging motivational questioning & clinical techniques
- Agentic GenAI system allows modular integration with LLM stacks for specialized use cases (Listener, Motivator)
- Improved safety monitoring of real-time conversations to create a best-in-class clinical guardrail system

AI powered Care Navigator

Q2 / Q3

- Wellness content recommendations pre and post provider sessions
- AI summaries for providers w/ conversational context, care activities, and wellness insights
- Maintenance and follow-up notifications, in-app behavioral reminders

Clinical AI Safeguards

Q1 / Q2

- Age gating to protect safety of minors (communal use monitoring)
- Clinical testing and human-in-the loop QA mechanisms paired with expanded automated risk evaluation
- Expanding guardrails for legal (privacy), ethical, technical (security), societal (emotional dependence), and reputational (member SAT) risks. Proactive guardrail behavior to perform real-time steering of conversations

Product

Outcome based Care at Every step

Care Outcomes

Q1 / Q2

- 90%+ completion on clinical assessments
- Subclinical wellness scores
- Historical wellness tracker and guided program improvement insights (mindful eating, substance consumption)

Scalable Provider Network

Q2 / Q3

- Advanced provider experience with rich EHR data
- Data governance, privacy controls, and secure messaging capabilities
- Seamless booking, cancelling and confirmation services for members and providers

Expense Benefit Management

Q2 / Q4

- Programmatic insights and dashboards for covered lives care impact (absenteeism reduction, speed of care delivery and symptom relief)
- Evidence-based care models and recommendations
- ROI analysis and proof

Bar Raising on Talent & Designing for High Performance

Total HC 182

- Product 15
- AI Labs 17
- Engineering 95 (+ 10 AI Eng in AI labs)
- Data Science & Analytics 19
- Creative, Design, Content Studios 36

Vertical Customer Pods

B2B2C
Health Plans & Employers

- **Core Engineering 55 FTE**
  Redesigned scope to focus on impact, training on AI tooling adoption. 9 eng are Full Stack + 6 Principal eng bar raising
- **Core Engineering 40 C**
  Identified top talent in contractors to convert w/ cost savings to HS
- **Product 15 FTE**
  6 Bar Raising leaders & ICs hired, 4 more to backfill

D2C2C
Consumer & Care Services

Horizontal Craft Guilds

AI Labs

- **Science 16 FTE + 1 C**
  10 eng moved into AI labs for ML Ops / ML Eng

Data Platforms

- **Data 19 FTE**
  2 Bar Raiser hired Data Science, Analytics, Client reporting, Data Governance

Design Studio

- **Design 20 FTE**
  Trained on Cursor

Content Studio

- **Studio 7 FTE + 9 C**
  AI Audio tooling & AI for translations
